Subject: RE: USEPA- Radiological Assessment the week of August 3rd: MTA

Eric,
Let me run this response by our corporate office early this morning and see if they are willing to sign as is so as to not slow the progress of the investigation. I will be in touch early this morning.

Thanks,

Tim

The release was drafted with the owner of the property. I am hesitant to change it without going to them, which means cancelling this morning.

Good Morning:

The legal staff of my contractor, Weston, asked for the last sentence to be removed from the release: "whether said losses, damages, expenses, personal injuries or death result from the negligence of said Railroad, its officers, agents or employees, or are otherwise caused." Revised attached

This is to confirm that Brian Lounsbury and Glenn Blackman from Metro-North will be meeting the EPA and its contractor at the Mount Kisco substation tomorrow, August 4, 2015, for purposes of the following:

1. Placement of several radon canisters in the substation for pick up on Friday, August 7, 2015 (arrangements for pick up on Friday should be made tomorrow).
2. Survey of inside of substation using hand held instrument
3. Survey of perimeter of substation using hand held instrument
4. Assessment of appropriate locations for soil borings

All contractor representatives must sign the attached Release and bring it with them and give it to Glenn.

Please mark up on a drawing and take photos of the locations for the soil borings as this may help in determining how best to accomplish this part of the work

Please remember your PPE.
